MECHANICAL GROUNDING CONNECTORS

More than 60 years of technological innovation has made BURNDY® mechanical grounding connectors one of the most widely used, highly respected lines in the industry. There is virtually no grounding application problem that this diversified line cannot help solve.

All BURNDY mechanical grounding connectors have been designed for easy installation and for outstanding durability. Only the finest high copper alloys are used in their manufacture, ensuring top performance under the most extreme environmental conditions.

UL467 Listed for direct burial applications in earth or concrete.

TYPES KC, K2C

SERVIT POST™

For Copper Cable to Flat

SERVIT POST™ used to ground one or two cables to steel structures, fence posts, transformers. Also used to tap one or two cables from bus bar. One-wrench installation.

① For 1 conductor
 ② For 1 or 2 conductors

NOTES:
 Add "-NSP" suffix to catalog numbers to have connector supplied with split lockwasher and nut

Equivalent Metric Size given in []; Metric sizes provided for reference only.

TYPE KCKF

Bulkhead Ground Connector

The “Bulkhead” connector is designed to allow a ground wire to be connected from the inside of a box or enclosure to the outside of a box or enclosure.

This new connector is supplied in kit form with a male SERVID POST™, female SERVID®, (2) stainless steel washers, split lock washer and sealing washer.

The available “Application Guideline” document helps describe the application with visuals and installation examples.

Features & Benefits

- Provides an easy way to connect ground wires “through” an enclosure wall
- Includes Male SERVID POST™, Female SERVID®, (2) Stainless Steel Washers, Split Lock Washer, Sealing Washer
- Split Lock Washer allows adjustment of conductor orientation
- Made of Silicon Bronze material (connectors) and Stainless Steel Hardware, Sealing Washer
- Meets NEMA 4X requirements when installed correctly
- Application Guideline document available
- Industry proven split bolt/SERVID POST™ technology

	Qty	Description
1	1	Male SERVID POST™
2	1	Stainless Steel Split Lock Washer*
3	2	Stainless Steel Flat Washer*
4	1	Sealing Washer*
5	1	Female SERVID®

*One flat washer and sealing washer to be installed on outside of box or, where applicable, to side of wall exposed to atmospheric or contaminated conditions. Remaining hardware to be mounted to opposite side of the wall as shown.

TYPE CL50-1

COPPER LAY-IN QIKLUG[™]

For Copper

The Lay-In QIKLUG[™] is manufactured from high strength pure electrolytic copper to ensure maximum strength and conductivity. UL467 Listed for direct burial in earth or concrete. The open-faced design allows for fast lay-in of the conductor without the need for cutting or breaking.

Catalog Number	Wire Range Copper	Stud Hole
CL50-1		
CL50-1TN ①	#14 [2.5 mm ²] - 4 [25 mm ²]	#10
CL50-1TNBULK ①		

①-TN version is tin plated, commonly used for solar panel grounding

Photo above shows a typical solar panel installation using CL50-1TN connectors.

TYPE CL

COPPER LAY-IN QIKLUG[™]

For Copper

Manufactured for maximum strength and conductivity, these lay-in lugs allow for continuous runs of conductor and are well suited as terminations as well. Tin-plated, set screw style connectors, three sizes cover a range from #14AWG to 250 kcmil. CL3/0-516TN and CL250-516TN are UL Listed and CSA certified. CL1/0-14TN UL Listed for grounding and CSA certified. 90° C rated. Suitable for copper conductors only.

Catalog Number	Wire Range Copper	H	W	L	T	K Dia.	Hex Size
CL1/0-14TN	#14 [2.5 mm ²] - 1/0 [50 mm ²] AWG	1.17	0.60	1.50	0.22	0.27	7/16-20 (Slotted)

Equivalent Metric Size given in []; Metric sizes provided for reference only.

TYPE GAR

For Parallel or 90° Copper Cable Connection to Rod or Pipe with the Same Connector

High copper alloy ground connector for joining a range of cable, parallel or at right angles to rod or tube. Especially good for fence posts. High copper alloy cast body with DURUM™ U-bolts, nuts and lockwashers, permit entire connection to be buried in ground or concrete without danger of corrosion.

Features & Benefits

- Wire to Rebar
- Fence Post Grounding Connector
- Wire to Pipe
- One-wrench installation
- UL 467 Listed
- Acceptable for direct burial

Wire at Right Angle to Pipe

Wire Parallel to Pipe

TYPES GAR-BU AND GAR3902 SERIES

Ground Connectors

Type GAR-BU is a high-conductivity copper ground connector for connecting a small to medium range copper ground conductor to water pipe as well as structural and reinforcing rod shapes. Universal acceptance of several sizes of cylindrical shapes makes this suitable for industrial construction and maintenance work as well as cathodic protection. Cable clamp swivels to permit parallel grounding of one pipe or 90° degree cable run for grounding several parallel pipes. Single wrench installation. UL467 Listed and CSA Certified.

Features & Benefits

- Cable clamp swivels at 90°
- Permits parallel grounding of one pipe or a 90° cable run for grounding several parallel pipes
- One-wrench installation
- -Simplified installation
- DURIMUM™ silicon bronze hardware (-BU Series)*
- Long lasting corrosion resistance and acceptable for direct burial in earth or concrete
- UL467 Listed
- Provides quality assurance to recognized industry NEC standards from an independent party

Equivalent Metric Size given in []; Metric sizes provided for reference only.

TYPE GAR-TC

**Water Pipe
Ground Connector**

Type GAR-TC is a high-conductivity copper ground connector that features a pre-drilled pad, allowing a 2-hole compression terminal to be directly connected to water pipe as well as structural and reinforcing rod shapes. Universal acceptance of several sizes of cylindrical shapes makes this suitable for industrial construction and maintenance work as well as telecommunications grounding. Terminal may be mounted parallel, 45° or 90° degrees to the pipe. Acceptable for direct burial.

Features & Benefits

- Large, smooth connector contact area between pipe and ground clamp
 - Provides large surface contact area to maximize contact area between connector and pipe
- The GAR-TC mounting pad permits parallel, 45° or 90° angle connections to the pipe
 - Provides maximum flexibility for field installation
- Pre-drilled pad for (2) 3/8" bolts on 1" centers
 - Allows direct mounting of (2) hole compression terminals up to 750 kcmil to pipe
- DURIUMTM silicon bronze hardware
 - Provide long lasting corrosion resistance acceptable for direct burial in earth or concrete
- One-wrench installation
 - Simplified installation
- UL467 Listed
 - Provides quality assurance to recognized industry NEC standards from an independent party. Type GAR-TC is acceptable for direct burial

NOTES:

Add suffix "-TNET" for electro-tin plated connector and electro-tin plated DURIUMTM silicon bronze hardware. Tin plated catalog number includes mounting hardware for second bolt hole.

Clean pipe surface beneath saddle until virgin metal is exposed, install GAR-TC ground connector and for maximum conductivity, apply PENETROXTM E oxide inhibiting compound around perimeter of saddle

TMH-289 includes (1) 38X125HEB bolt, (1) 38CHEN nut, (1) 38SW split washer and (2) 38FW flat washers, ordered separately.

Equivalent Metric Size given in []; Metric sizes provided for reference only.

TYPE GD

Cable to Rod/Tube Ground Connector

For Two Copper Cables to Rod or Tube

High copper alloy ground connector for joining a range of two parallel cables to rod or pipe. Especially good for grounding fence posts. High copper alloy cast body with DURIMUM™ U-bolts, nuts, and lockwashers make the GD suitable for burial in ground or concrete. One-wrench installation. UL467 Listed. Acceptable for direct burial in earth or concrete.

NOTE:
Complies with NFPA 78-86 HEAVY DUTY stacks; use suffix "-LD" for lead plating for HEAVY DUTY stack applications

TYPE GP
Ground Connector
For Two Copper Cables to Rod or Pipe

High copper alloy ground connector for joining a range of parallel cables perpendicular to rod, pipe or column. Also used with one groove for run, the other for tap to equipment. High copper alloy cast body and DURIMUM™ U-bolts, nuts, and lockwashers make the GP suitable for direct burial in the ground or concrete. One-wrench installation. UL467 Listed. Acceptable for direct burial in earth or concrete.

TYPE GK

Ground Connector

For Three Copper Cables to Rod or Pipe

High copper alloy ground connector for joining three equal cables to rod or tube. Cable grooves take a wide range of cable. High copper alloy cast body and DURUM™ U-bolts, nuts, and lockwashers make the GK suitable for direct burial in soil or concrete. One-wrench installation. UL467 Listed. Acceptable for direct burial in earth or concrete.

TYPE GC-A

Dual Rated Ground Clamp

For Copper and Aluminum Cable

GC-A ground clamps are UL Listed for use with either copper or aluminum conductors to copper water pipe, galvanized pipe or steel conduit. All clamps are constructed from tin plated high-strength extruded aluminum alloy. PENETROX™ oxide inhibiting joint compounds are recommended for all aluminum applications.

Features & Benefits

- Clamps are dual rated for both copper and aluminum conductors
 - Maximum flexibility of application
- All connectors are tin plated
 - Provide low contact resistance and prevents galvanic corrosion
- All clamps are range taking
 - Only 3 catalog numbers covers complete range of applications from 1/2 - 4 inches

Catalog Number	Conduit, Pipe, or Water Tube Size	Wire Range	Screw Type	W	L	Hex Size

TYPE GG

Ground Connector

For Copper Bar, Strap, Braid or Cable to Rod or Tube

High copper alloy ground connector for joining bar, strap, braid or cable to rod or tube. High copper alloy cast body, DURIMUM™ U-bolts, nuts and lockwashers make the GG particularly effective for use with braid for ground rods, switch handles, fence posts and gates. One-wrench installation.

TYPE GQ

Ground Connector

For Copper Cable to Tube

High copper alloy ground connector for cross connecting a wide range of cable. High copper alloy, cast body, DURIMUM™ U-bolts, nuts, and lockwashers make the GQ suitable for burial in soil or concrete. One-wrench installation. UL467 Listed. Acceptable for direct burial in earth or concrete.

TYPE GCRT1/0 GROUND CONNECTORS

Ground Clamp Range Taking, up to 1/0

The GCRT1/0 is a range taking ground rod clamp offering another choice from the BURNDY® family of connectors. The GCRT1/0 works on 1/2", 5/8" and 3/4" ground rods with a wire range of #8 through 1/0! The clamp is UL467 Listed for direct burial in earth and concrete. Catalog number GCRT1/0.

Features & Benefits

- Range taking design helps reduce inventory
- UL Listed and CSA Certified
- UL467 Listed for direct burial in earth and concrete

TYPE GRL

Light Duty Economical Ground Rod Clamp

UL 467 Listed. Acceptable for direct burial.

TYPE B

**Flexible Copper Braid
Bonding Jumpers
Bonding Straps**

Flexible copper braid jumpers designed to take up linear expansion and contraction, compensate for misalignment and absorb vibratory movement of electrical equipment and devices. Made of flat extra flexible, tinned, pure copper braid, with unplated, seamless, pure copper ferrules formed into a rectangular shape on each end. Shown are standard 6 & 9 inch flexible copper braids; other lengths, plating and mounting hole sizes are available; contact BURNDY for more information.

TYPE B

Flexible Copper Braid

Flexible copper braid jumpers designed to take up linear expansion and contraction, compensate for misalignment and absorb vibratory movement of electrical equipment and devices.

Made of flat extra flexible, tinned, pure copper braid, with unplated, seamless, pure copper ferrules formed into a rectangular shape on each end.

Last two numbers in catalog number indicate total length of braid in inches (e.g., BD12N or BD12 is 12" long braid jumper).

Other lengths, plating and drilling are available. Refer to factory.

② Certified to CSA C22.2, No. 41 Grounding and Bonding Equipment Standards in addition to the UL467 Listing which all items above are Listed to.

TYPES GB, GBM

Ground Connector

For Copper Cable to Bar

High copper alloy ground connector for joining a range of cable to 1/4" thick bar.* Type GB separates cable from bar, GBM clamps cable directly on bar surface. One-wrench installation. UL467 Listed. The high copper alloy cast body and DURIMUM™ bolts, nuts, and lockwashers make the GB and GBM suitable for direct burial in concrete or ground.

NOTE:
Add 'GS' suffix for galvanized steel hardware.
For other bar thicknesses: 1/4" to 1/2" add suffix 'T4'; 1/2" to 1" add suffix 'T8'; catalog numbers shown above come with bolt to accommodate the cable as noted and bar thickness up to 1/4" thick.

TYPE GL

Ground Connector

For Two Copper Cables to Bar

High copper alloy ground connector for joining a wide range of two parallel cables to 1/4" thick bar.* Two-bolt design, separates cable from bar. One-wrench installation. UL467 Listed. The high copper alloy cast body and DURIMUM™ bolts, nuts, and lockwashers make them suitable for direct burial in concrete or ground.

NOTE:

Add 'GS' suffix for galvanized steel hardware.

For other bar thicknesses: 1/4" to 1/2" add suffix 'T4'; 1/2" to 1" add suffix 'T8'; catalog numbers shown above come with bolt to accommodate the cable as noted and bar thickness up to 1/4" thick.

TYPE GZ

Ground Connector

For Copper Cable to Bar

High copper alloy ground connector for joining a wide range of cable to 1/4" thick bar*. Cable is gripped by curving it around the clamping bolt in connector groove. UL467 Listed. The high copper alloy cast body and DURIMUM™ bolts, nuts, and lockwashers make them suitable for direct burial in concrete or ground.

NOTE:

Add 'GS' suffix for galvanized steel hardware.

For other bar thicknesses: 1/4" to 1/2" add suffix 'T4'; 1/2" to 1" add suffix 'T8'; catalog numbers shown above come with bolt to accommodate the cable as noted and bar thickness up to 1/4" thick.

TYPE GC-CT

Cabletray Ground Clamp

This unique connector incorporates features which are unmatched. Made of tin-plated cast copper alloy, it accommodates either one or two conductors, copper or aluminum cable. In addition to a low profile head with a deep Phillips recess, the galvanized steel bolt has a ribbed neck which prevents rotation during installation when installed in a .44 diameter hole. When used on aluminum conductor, the cable must be scratch brushed and PENETROX™ A joint compound must be used on cable and connector. UL467 Listed for copper conductor only. Suitable for direct burial in concrete or earth.

Catalog Number	Accommodates Copper or Aluminum Conductor in either groove	B	CF	H	J	W
GC2525CT	#6 Sol. [16mm ²] - 1/0 Str. [50mm ²]	1.12 [28.45]	0.56 [14.22]	1.95 [49.53]	3/8 [9.5]	1.45 [36.83]

NOTES:

The bolt head is mounted on the inside wall of cabletray to avoid damage to the cable insulation. May be used with aluminum or galvanized steel cabletray.

TYPE BDT

BONDIT®

House Mounted or Meter Socket Mounted

Designed to meet the requirements of NEC Article 250.94 "Bonding for Other Systems". Corrosion-resistant stainless steel set screws. Accepts main ground wire (#2-#8 [34mm²-8mm²]) and up to 4 intersystem wires (#6-#14 [13mm²-2mm²]). Same design can be mounted directly to the meter socket or mounted to the house. Innovative design does not damage meter socket and will not void warranty.

Catalog Number: **BDT1**

Features & Benefits

- Made in the USA!
- Meets Intersystem Bonding Requirements; NEC 250.94
- One connector does it all
- House mount or meter socket mount
- Incorporates proven BURNDY® SERVIT POST™ design
- Stainless steel set screws
- Accepts main ground wire (#2-#8), up to 4 intersystem wires (#6-#14)
- Easily mounts to meter box during new installation or can be wall mounted
- Easy to follow instructions included
- Does not damage meter socket; no worries about damaging the paint or voiding warranties
- Easily installed with a wrench and screwdriver
- Open design prevents buildup of hornets, bees, spiders

CONFIGURATION 1 - MOUNTED TO ENCLOSURE

1. Punch out a 1/2" or 3/4" knock out on the electrical enclosure.
2. Begin assembly by installing the ground electrode conductor in the SERVIT POST™ inside the electrical enclosure. Torque on SERVIT® NUT: 275 in-lb max.
3. Install the rest of the connector shown below, it is not necessary for the bus bar to be aligned parallel with the enclosure. (Note: the split washer is not used in this configuration.)
4. Tighten the intersystem ground wires with set screws in the bus bar to a maximum torque of 35 in-lb.
5. Adhere the BONDIT® location sticker to the front of the electrical enclosure.

CONFIGURATION 2 - MOUNTED TO EXTERIOR WALL

1. Begin by assembling the connector as shown in figure below. Be sure SERVIT POST™ is as tight as it can be while its groove is aligned with the ground electrode conductor. (Note: the flat washer is not used in this configuration.)
2. Use two mounting screws (not included) to secure the connector to the exterior wall so that the set screws in the bus bar face downward.
3. Install the ground electrode conductor into the SERVIT POST™ while turning the nut/pressure bar assembly to a maximum torque of 275 in-lb (use 2 wrenches if necessary).
4. Tighten the intersystem ground wires with the set screws in the bus bar to a maximum torque of 35 in-lb.
5. If hidden from view, use the BONDIT® location sticker to indicate the location.

BONDIT[®] - Wall Mounted

Intersystem Bonding Connector

NEC 250.94 refers to a requirement in the 2008 National Electrical Code. In the past, ground wires from telephone systems or cable systems were allowed to be grounded separately from the GEC (Ground Electrode Conductor from the main electrical service). With the new code, all ground wires from separate systems such as telephone systems, CATV and radio systems must be tied together at one location to the GEC. Hence, the term intersystem refers to tying all of the "system" grounds together in one location. The BONDIT[®]- Wall Mount is a great solution when the GEC is exposed (not in conduit).

With the new BONDIT[®] - Wall Mount connector BURNDY provides an economical solution that meets the needs of NEC 250.94.

Catalog Number: **BDTIBB**

Features & Benefits

- Meets the Intersystem Bonding requirements of NEC2008 250.94
- Provides an easy to access grounding point for utilities such as telecom and cable
- Easy to install
- UL Listed and CSA Certified
- Tin-plated connector body provides long-lasting corrosion resistance
- Stainless steel set screws
- Accepts main ground wire (#2 to #6), up to (4) inter-system wires (#4 to #14)
- Supplied with durable cover, easily secured over connector body
- Approved for use with solid or stranded conductors

BWB680 Series

BURNDY® Pool Water Bonding Kit

NEC 680.26(C) states: "An intentional bond of minimum conductive surface area of 9" shall be installed in contact with the pool water. This bond shall be permitted to consist of parts that are required to be bonded in 680.26(B)".

In order to comply with this requirement BURNDY is offering the BWB680 Series. Made of non-corrosive stainless steel, the BURNDY water bonding kit maintains constant contact with pool water to ensure that the pool is effectively bonded at all times.

BURNDY BWB680 Series is one of the few and the most user friendly, products on the market that complies with this code. Other products are placed in the plumbing, which is not always in contact with the water and therefore does not meet the code. Since the BWB680 Series is placed in the skimmer, it is always in contact with the water.

Included in the BURNDY BWB680 Series Bonding Kit: One (1) bonding plate; one (1) rubber sealing washer; two (2) flat washers; two (2) lock washers; two (2) nuts; and one (1) BURNDY CL501-TN

Features & Benefits

- Easy installation
- Mounting hardware included
- UL Listed
- Placed out of the way on the side wall of the skimmer below the basket

Catalog Number	Pool Type

BWB680IG	In-Ground

BURNDY® Static Discharge Reels

Static Discharge Reels are an excellent addition to the BURNDY® static discharge line of products. These reels are often used to dissipate static charge buildup developed while filling or dispensing fuel or other combustible liquids from fuel trucks or rail cars. Often used in the petroleum industry but applicable in any area where static discharge creates potential hazard.

These reels are heavy duty, of rugged construction and are supplied with a 100 amp universal jaw-type grounding clamp. The reels are available with 100 ft and 50 ft lengths. All reels come with spring rewind and centrifugal brake. The tension can be adjusted on these reels and installation instructions are included to ensure the most efficient mounting method.

Every reel is **Proudly Made in the USA** and meets the stringent quality expectations of the BURNDY® portfolio of grounding products.

BSD2050

BSD2050N

Features & Benefits

- 100 ft and 50 ft cable lengths
- Automatic E-Z PULL™ Rewinding
- Rugged Steel Construction
- Compact Enclosed Design (excluding BSD20100)
- Positive Ratchet Lock with Ratchet On/Off Switch (excluding BSD20100)
- Permanent Ratchet Lock (BSD20100 only)
- Steel Cable Installed
- 100 Amp Universal Jaw-Type Grounding Clamp
- Red Baked-on Finish
- Made in the USA

TYPE GIE-G

Ground Connector

For Vehicle Grounding
Heavy Duty Construction

High-strength copper alloy ground clamps for grounding gasoline trucks, tank cars, aircraft and other vehicles where danger of explosion due to static electricity exists. Corrosion resistant and supplied with nonsparking, adjustable, replaceable contact grip screws. Automatic safety release disconnects should a vehicle unexpectedly move from the grounded area. Accommodates 4 Str. [21mm²] flexible copper cable.

Catalog Number	Description	Material	Point Configuration
GIE4CG3	Assembly Beryllium Copper	Beryllium Copper	Assembly

GIE4CG4P7	Stainless Steel CUP Point Only	Stainless Steel	Cup Point

TYPE GIE-G

Ground Connector

Accommodates flexible rubber sheath cable ranging from #6 to #2 [13mm²-34mm²] conductor.

Catalog Number: GIE2CG3

TYPE GCB63T13G1

STUDBUG™ for Static Grounding Applications

GCB63T13G1 is a temporary grounding stud for use on rail cars, chemical trucks, hazardous waste tankers or a petroleum vehicle to allow for static grounding protection, while in operation. It provides a contact point, allowing the rail car, truck or tanker to be grounded to an equipotential grid or ground rod, by using static reel or a ground cable.

Features & Benefits

- Made of bronze, and supplied with silicon bronze hardware
- Secured by 1/2" hexagonal nut and split lock washer
- Can be used with universal clamps and ball stud clamps
- Can be used at various angles to reach inaccessible areas
- Add suffix "SS" for grounding stud with stainless steel hardware

Note:
 ① Can be used with plate, bus bar or structural steel up to 1/4" thick.

RAIL CONNECTOR

Mechanical clamp connectors designed for use in power, contact or running rail applications. Connectors are cast of a high conductivity copper alloy, tin-plated, and assembled with high-strength DURIMUM™ hardware. Connectors designed for extended service life.

TYPE GXP1828RF

SUPER-CLAMP™

SUPER-CLAMP™ Raised Floor Ground Connector

Raised Floor Pedestal Ground Connector. The GXP1828RF is a versatile, easy to install, range taking ground connector. This grounding clamp accepts a wide range of pedestals and conductors. Accepted pedestal range is 3/4" through 2" (7/8 - 2" round; 3/4" - 1-1/2" square). The wire range is #6 solid to 4/0 stranded. The wires can be arranged in parallel or in a cross grid configuration - accepts 1 or 2 wires.

UL Listed for the US and Canadian markets (cULus). A high copper alloy body ensures excellent conductivity and the hardware is made of stainless steel. The connector is also rated for Direct Burial. The versatility of the connector makes it an excellent choice for applications requiring multiple conductor sizes and/or configurations.

Features & Benefits

- Fits a wide range of raised floor pedestals, from 3/4" to 2" (7/8 - 2" round; 3/4" - 1-1/2" square)
- Accepts a wide range of wire sizes, from #6 solid to 4/0 stranded
- Accommodates parallel wires or cross grid arrangements; wires can be installed in cross grid configuration!
- Accepts one or two wires in any configuration
- Easy to install - open design eliminates need to disassemble before installing
- One socket size fits all hardware! (1/2" socket size)
- Made of high copper alloy
- Stainless steel hardware
- UL Listed for the US and Canadian markets (cULus)
- Rated for Direct Burial

TYPE GRF

UNIGROUND[™]

**UNIGROUND[™] Raised Floor
Grounding Connector**

The BURNDY[®] UNIGROUND[™] is a universal grounding clamp, specifically designed for all raised flooring systems. It can be installed on round or square pedestals and can accommodate one or two grounding wires to make an efficient grid. The underfloor signal reference grid provides the low impedance ground path that attenuates high frequency static and 60 Hz transient noise for cleaner data output. UL467 Listed.

Features & Benefits

- One connector fits all applications
 - Ease of specification and installation
 - Single bolt design provides ease of installation:
 - No need to disassemble
 - Single wrench installation
 - Accepts 1 or 2 ground conductors
 - Requires less connectors to install signal reference grid
 - Tin plated cast bronze construction
- Resists corrosion and provides extended life ground connection
 - Grounds all pedestals (round or square). Will handle up to 7/8" square and 1" round
 - Ease of installation. One connector does it all
 - Serves 3 needs:
 1. Signal Reference Grid
 2. Static Ground
 3. Fault Current Ground
 - UNIGROUND[™] solves all possible grounding problems found in computer applications today

Catalog Number	Number of Conductors	Conductor Size Sol. & Str.	Pedestal Type		B	H	J	W

TYPES GP-G1, GP-RT

Raised Floor Grounding Clamps

High copper alloy ground connector for raised floor computer grounding applications. These connectors can be installed on round and square pedestal applications and will accommodate one or two grounding wires to make an efficient grid. The underfloor signal reference grid provides the low impedance ground path that attenuates high frequency static and 60 Hz transient noise for cleaner data output. UL467 Listed. In addition we offer the GP1726RT, which is especially designed for penetrating epoxy paint on pedestals. This patented connector offers a low impedance, time saving connection between conductors and the pedestal.

Features & Benefits

- Accepts 1 or 2 Ground Conductors
 - Requires less connectors to install signal reference grid
 - Made of copper alloy
 - DURIMUM[™] U-Bolts, nuts and lockwashers
 - Provides a low impedance ground path for maximum performance
 - Grounds all pedestals (round or square)
 - Will handle from 3/4" to 1" round or square
- Serves 3 needs
 1. Signal Reference Grid
 2. Static Ground
 3. Fault Current Ground
 - Connectors solves all possible grounding problems found in computer applications today

TYPE BBB

BURNDY® Bus Bar

Copper Bus Bar

Bare copper BusBar, UL Listed for grounding. Available in many sizes and hole patterns. Brackets and insulators included with most styles. Also available in undrilled, horizontal and vertical versions. BusBar is used in a variety of applications. Can be used as a common ground point and "power" applications as well.

THE HYGROUND® IRREVERSIBLE COMPRESSION SYSTEM

Example Grid Layout

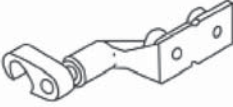

THE HYGROUND[®] IRREVERSIBLE COMPRESSION SYSTEM

BURNDY[®] has developed an irreversible compression ground system which meets the most stringent safety and performance requirements, including those of OSHA and nuclear power plant design. Performance excellence and long life expectancy are the system's basic design guidelines. It is a complete system which consists of connectors for grid cross connections, taps, splices, cable to ground rod, ground plates and terminations.

Our irreversible compression ground connectors employ well-proven design principles and technology that have been in existence for over 60 years.

Connectors are just one component of our Irreversible Compression Ground System. Installation tooling is also an integral part of this system. BURNDY[®] pioneered the compression connector principle and continues today to be the leader in compression technology. Our tooling package is the most extensive in the industry and affords the user many options.

SYSTEM**

(Continued)

Features and Benefits

- Irreversible compression.
 - ◊ Meets NEC code, section 250.
- Material-pure wrought copper extrusions, rod and seamless tubing—identical material to the conductor.
 - ◊ Completely eliminates the possibility of corrosion due to dissimilar metals.
- Heavy duty connector design.
 - ◊ All connectors will carry the equivalent or greater current carrying capacity of the conductor while maintaining high mechanical strength and electrical integrity.
- Range taking design—minimum number of connector combinations required to install a conductor range of #6 solid to 500 kcmil plus 1/2", 5/8", 3/4", and 1" ground rods and rebar.
 - ◊ Inventories are kept to a minimum and product selection is simplified.
- System engineered tooling.
 - ◊ Each tooling recommendation has been designed to ensure reliability of the connection.
- Irreversible compression connectors can be installed in all kinds of weather.
 - ◊ Eliminates costly construction delays and enables the installer to better schedule his job.
- May be installed without special training or special tools. Y750 crimps entire range.
 - ◊ Low installed cost.
 - ◊ Simplified installation.
- Each connection can be made in less than 3 minutes.
 - ◊ Low installed cost.
 - ◊ Simplified installation.
- Each connector is clearly marked with catalog number, conductor size and installation die information.
 - ◊ Easy and accurate identification.
- Inspection ports are provided to assure proper insertion of the conductor.
 - ◊ Built-in quality assurance.
- The die index number is embossed on the connector after completion of the crimp.
 - ◊ Facilitates speedy inspection of installed connectors to insure consistently reliable and sound connections.
- Most HYGROUND® irreversible compression elements are prefilled with PENETROX™ and individually sealed.
 - ◊ Ensures that all contact surfaces are in the proper condition for installation.
 - ◊ Ensures the electrical integrity of the finished connection by inhibiting moisture and contaminants from entering the contact area.
- All HYGROUND® irreversible compression connectors are Listed in conformance with Underwriters Laboratories Standard UL467 and conform to applicable sections of the National Electrical Code.
 - ◊ May be used in direct burial or concrete embedded grounding applications.
- All HYGROUND® irreversible connectors (with the exception of type YGA and YGS) have been tested successfully according to requirements of Standard IEEE 837.
 - ◊ Meets tough industry performance requirements.
 - ◊ UPRECRIMP dies give added mechanical strength. UPRECRIMP 34 for 3/4" rod, UPRECRIMP 12 for 1/2" rod, and UPRECRIMP 58 for 5/8" rod (now includes undersized U.S. marketplace rods).
- Allows connection to most sizes of structural steel with no drilling, tapping, or welding.
 - ◊ Safely installed at low cost. Hot work permits are not required to install in hazardous areas

Please contact Customer Service for applications requiring IEEE-837 2014.

TYPE YGL-C

HYGRID[™]

An irreversible compression ground grid cross connector which allows adjustment of the compression elements prior to installation. Only six connectors and four dies are required to install all combinations from #6 solid through 500 kcmil. UL467 Listed. Acceptable for direct burial in earth and concrete. Prefilled with PENETROX[™] compound and strip sealed.

- ① Dimensions in brackets { } represent lightning protection conductors
- ② Where a "U" or "PU" die is recommended with Y45 HYPRESSTM, a PT6515 adapter is required
- ③ Where a "U" or "PU" die is recommended with Y46 HYPRESSTM, a PUADP-1 adapter is required
- ④ These connectors can only be installed using the Y750, Y45 or Y46 series of HYPRESSTM tools; cannot be installed with the Y35 or Y39 series
- ⑤ When using #6 Sol in tap, fold conductor double for improved fill
- ⑥ Not UL96/CSA
- ⑦ When using 3/0 in tap, minimum run conductor must be 2/0 Str.
- ⑧ Clean rust and protective coatings from rebar prior to installation to provide proper ground connection. Pre-crimping is not required.

Ground Rod Dia.	PRECRIMP Dies
1/2" [12.5 mm]	UPRECRIMP 12
5/8" [15.6 mm]	UPRECRIMP 58
3/4" [18.8 mm]	UPRECRIMP 34

For increased rotational resistance on ground rods, pre-crimp ground rod with U2CABT, UPRECRIMP dies may be used for even greater rotation and vibration resistance on ground rods.

Equivalent Metric Size given in []; Metric sizes provided for reference only.

TYPE YGHP-C

HYTAP™

High Strength Copper Irreversible Compression Ground Rod Tap Connector

Irreversible compression ground tap figure 6 can be used as a tap connector or as a tap splice connector. Four die sets and eight connectors can accommodate a conductor range from #8 solid through 500 kcmil plus 1/2", 5/8", and 3/4" copper bonded ground rods. UL467 Listed. Acceptable for direct burial in earth and concrete. Prefilled with PENETROX™ compound and strip sealed.

Features & Benefits

- Tap (A) accepts a continuous run on tap conductor.
- Tap (B) accepts a tap conductor only
 - One connector style can be used for many applications, reducing number of connectors in inventory
- Material is high conductivity wrought copper extrusion, identical material to the conductor
 - High-conductivity copper minimizes resistance and voltage drop. Eliminates the possibility of corrosion due to dissimilar metals
- System engineered tooling
 - The tooling recommendation has been designed to ensure a reliable, dependable connection every time
- The die index number is embossed on conductor after completion of crimp
 - Facilitates speedy inspection of installed connectors to insure consistently reliable and dependable connections
- Prefilled with PENETROX™ and individually sealed in clear polyethylene sheet
 - Ensures the electrical integrity of the finished connection by inhibiting moisture and contaminants from entering the contact area. Maintains long-term high-conductivity
- UL467 Listed
 - May be used in direct burial or concrete embedded grounding applications. Provides quality assurance to recognized industry NEC standards from an independent party
- "Third Hand" constrains conductors while installer completes crimp, included with each connector
 - Simplifies installation, reducing installed cost

IEEE-837

SINGLE TAP

CONTINUOUS RUN

CONTINUOUS RUN AND TAP

Catalog Number	① Ground Rod Dia.	② Tap Conductor	Dimensions			③ Installation Tooling Die Number (# of Crimps)		Die Index

YGHP58C2W-2TN								

- ① Ground rod must be precrimped with die U2CABT (Index 348); for greater rotational resistance use UPRECRIMP die; Galvanized Steel Rods require YGHP58C2W-2TN
- ② Either tap position may be left void when fewer than (2) conductors are used
- ③ See Tooling Section in Master Catalog for complete tool and die listing
- ④ Use PUADP-1 with "U"-dies in Y46

NOTE: A 12" bend radius is recommended for the conductor

TYPE YGHC-C

HYTAP™ Connector

Irreversible compression ground tap figure "C" connectors. Accommodates all cable combinations from #6 solid through 500 kcmil. "C"- shaped opening permits placing two continuous parallel cables into conductor groove. UL 467 Listed. Acceptable for direct burial in earth or concrete. Prefilled with PENETROX™ compound and strip sealed. Certain sizes are also UL467 Listed and CSA Certified for wire to ground rod.

TYPE YSHG

**HIGH STRENGTH COPPER
IRREVERSIBLE COMPRESSION**

Double H-Tap Connector

Type YSHG Double H-Tap grounding series is comprised of five connectors designed to accommodate wire range sizes #14 through 500 kcmil, including ground rod sizes: 3/4", 1", and rebar sizes: #6, #8 and #9. Prefilled with PENETROX[™] E2 and strip sealed.

Features & Benefits

- UL467 Listed
 - Suitable for direct burial in earth or concrete
- Material is high conductivity copper extrusion
 - Minimizes resistance, eliminates corrosion due to dissimilar metals
- Grooves are prefilled with PENETROX[™] E2 oxide inhibitor and individually sealed
 - Inhibits moisture and contaminants ensuring electrical integrity

① Ground rod must be pre-crimped with die U2CABT (index 348) when the PU998 dies are used in the Y750, PAT750, Y35, Y39, Y45, Y46 and PAT46 tools; pre-crimping is not required when the P1011, S1011, S1012 or U1011 dies are used; UPRECRIMP dies may be used for additional mechanical resistance on ground rods

② Where a PU998 die is recommended with the Y45 HYPRESS™, a PT6515 adapter must be used

③ Where a PU998 die is recommended with the Y46 HYPRESS™, a PUADP-1 adapter must be used

④ These connectors cannot be installed with the Y35 or Y39 HYPRESS™

NOTES:

The catalog numbers shown are for unplated copper connectors for use on copper clad or stainless steel ground rod. To order electro-tin plated connectors for use on galvanized steel ground rod add suffix "-TN" to the catalog number. The ground rod hole diameter is larger for galvanized steel ground rod in the tin plated connector.

Complete die catalog numbers do not always appear on the connector, sometimes it is the die index.

TYPE YGHR-C

HYTAIL™

High Strength Irreversible
Compression Ground Rod
Tap Connectors

Type YGHR-C irreversible compression grounding connector is engineered specifically for the Telecommunications Industry for (1, 2 or 3) #2 solid, tinned or bare conductor taps. UL467 Listed. Acceptable for direct burial in earth or concrete. BURNDY® has designed this connector to meet the stringent requirements of OSHA, the National Electric Code (NEC), UL, and the Telecommunications Industry. Performance and long life are this connector's basic design guidelines.

Features & Benefits

- Tap side 1, 2 or 3 conductors
- One connector style can be used for many applications
- Material is high conductivity wrought copper extrusion, identical material to the conductor
- High-conductivity copper minimizes resistance and voltage drop. Eliminates the possibility of corrosion due to dissimilar metals
- System engineered tooling
- Each tooling recommendation has been designed to provide a reliable, dependable connection
- The die index number is embossed on connector after completion of crimp
- Facilitates speedy inspection of installed connectors to ensure consistently reliable and dependable connections
- Prefilled with PENETROX™ and individually sealed in clear polyethylene sheet
- Ensures the electrical integrity of the finished connection by inhibiting moisture and contaminants from entering the contact area. Maintains long-term high-conductivity
- UL 467 Listed. Acceptable for direct burial
- May be used in direct burial or concrete embedded grounding applications. Provides quality assurance to recognized industry NEC standards from an independent party

RUN

RUN AND TAP

Catalog Number ^⑤	Ground Rod Diameter ^①	*Tap Conductor ^⑦	Installation Tools, Die Set Catalog Number (# of Crimps)		Die Index
			PAT750/Y750 ^③ Y35 ^④ /Y39	Y46 HYPRESS™ ^②	
YGHR58C2W-3	5/8" [15.9]	#2 Sol [35 mm ²] Copper 1, 2, or 3 may be connected	PU998 (1) ^⑥ U1011 (2)	PU998 (1) ^⑥ U1011 (2) P998 (1) P1011 (2)	998/1011

①Contact BURNDY® for other ground rod diameters
 ②PU998 and U1011 die sets require PUADP-1 adapter for use in the Y46 HYPRESS™
 ③The PAT750 and Y750 utilize PU dies and the U1011 die
 ④The Y35 only uses PU998 die
 ⑤To order electro-tin plated connector for use on galvanized steel ground rod add suffix "-TN" to the catalog number. The ground rod hole diameter is larger for galvanized steel ground rod in the tin plated connector
 ⑥Ground rod must be precrimped with die U2CABT (Index 348) when PU998 die set is used in the Y35, Y750 or Y46 HYPRESS™ tools; for even greater mechanical resistance use UPRECIMP58 dies
 ⑦Tap positions may be left void when fewer than (3) conductors are used

Equivalent Metric Size given in []; Metric sizes provided for reference only.

TYPE YGF

Grounding Plate

The irreversible compression ground plate is designed to withstand the rigors of concrete construction. The ground plates are made of high strength, high-conductivity cast copper alloy with a pure wrought copper compression element. In addition to the tapped NEMA size holes and spacing on the face, the plate comes with a tapped hole on the underside for ease of positioning prior to pouring the concrete. UL467 Listed. Acceptable for direct burial in earth or concrete. Prefilled with PENETROX[™] compound and strip sealed

Figure 1

IEEE-837

Figure 2

NOTES:

- ① This tapped hole may be used to position the grounding plate on a threaded rod prior to placement of the concrete. 3/8-16 thread with 1.00 EFF. Thread is standard. If other thread is required, add appropriate suffix code to catalog number. -50 (1/2-13, .94 EFF. Thread), -62 (5/8-11, .94 EFF. Thread) and -75 (3/4-10, .81 EFF. Thread) Example: YGF34-4N-50 is YGF34-4N with 1/2-13 Thread
- ② Plastic plugs are provided to keep dirt out of the threaded holes until the attachment of grounding terminals

① Where a "U" or "PU" die is recommended with the Y45 HYPRESS[™], a PT6515 adapter must be used
 ② Where a "U" or "PU" die is recommended with the Y46 HYPRESS[™], a PUADP-1 adapter must be used
 ③ These connectors can only be installed using the Y750, Y45 or Y46 HYPRESS[™] with recommended dies, they cannot be installed with the Y35 or Y39 HYPRESS[™]

TYPE YGIB

GROUNDLINK™

An irreversible compression ground connection which allows attachment to a structural steel standard (angled) or wide flange (parallel) beam. Installed with a required 5-piece die set, Catalog PIPEAMKIT or UIBEAMKIT. Die index 1105. GROUNDLINK™ connectors are made of high-conductivity wrought copper and come pre-filled with PENETROX™ E compound and strip sealed. Connector shipped with thread protectin studs only. Order terminal mounting hardware (TMHG kits) separately.

IEEE-837

NOTES:

Terminals connector to be ordered separately. When I-beam connector is used with type YGHA terminal, the connection meets IEEE 837. YGA-2N, YA-2N and other BURNDY® 2-hole NEMA copper terminals are suitable.

Order TMHG Terminal Mounting Hardware Kit separately. Kit consists of 2 studs, 2 flat washers, 2 lockwashers and 2 hex nuts.

Using the 1/4 hex key wrench, screw the stud into the connector until stud bottoms out in connector. Install a YGHA terminal, flat washer, lockwasher and hex nut onto stud. Tighten and torque to 480 pound-inches.

Dimensions shown Diagrams 1 and 2 reflect the minimum dimensions required on a beam to properly install the I-beam connector.

To correctly determine the appropriate YGIB connector to use based on flange thickness, order either YGIBGAUGE1 or YGIBKIT1 (KIT1 contains WIREMIKE™).

TYPE GSTUD-HY

VERSITAIL™

Structural Steel
Grounding Connector

INSTALLATION

1. Weld the VERSITAIL™ to the steel member.
2. Select the proper connector for your specific application.

- FOR COMPRESSION CONNECTORS**
 Select the proper BURNDY® “YGHP,” connector. Clean the conductor, join the VERSITAIL™ and the grounding conductor together with the recommended tool and die set, then crimp the connector over the knurled area of the VERSITAIL™.
- FOR MECHANICAL CONNECTORS**
 Select the properly sized BURNDY® connector. Clean the conductor, then apply PENETROX™ E oxide inhibiting compound on the contact area for increased effectiveness and service life. Put the connector over the knurled area of the VERSITAIL™ and apply the recommended torque value for correct installation.

Features & Benefits

- The VERSITAIL™ may be welded to steel surfaces quickly and easily with normal construction equipment
- The VERSITAIL™ eliminates costly disk grinding and the need to expose virgin metal, the welding process burns through the oxidation and “scale” to establish excellent electrical grounding continuity
- The VERSITAIL™ may be installed by the welder in the field or at the steel fabricator based on customer preference
- The VERSITAIL™ pure copper coating over low carbon, hot rolled steel is compatible with standard welding processes, no toxic gasses are generated
- The VERSITAIL™ knurled surface is copper plated and specifically designed to ensure excellent mechanical gripping and electrical integrity for BURNDY® compression and mechanical connectors in all grounding applications
- The VERSITAIL™ may be installed during adverse weather conditions thus eliminating costly construction delays
- Low installation cost.
- No drilling
- No cleaning
- No special preparation
- Low Carbon, hot rolled steel
- Pure copper plated finish

* This is the equivalent rating for continuous service. Large conductors may be connected using both compression and bolted connectors in potential grounding fault applications

TYPES YGT & YTTAG

Static Grounding Receptacle

Type YGT static grounding receptacles are designed for static grounding of equipment. The receptacle is connected to the ground grid with HYGROUND® compression connectors and finished flush with surface to provide a permanent corrosion proof grounding point.

Fig. 1

Fig. 2

Catalog Number	Figure #	HYGROUND® Connector	H	D	Y Dia	Z Dia	TD
YGT275	1	Select suitable YGHR or YGLR for 3/4" ground rod and sized to ground conductor	5.5 [139.7]	2.75 [69.9]	0.75 [19.1]	0.56 [14.2]	-
YTTAG388	2		6.5 [165.1]	4.75 [120.7]	0.75 [19.1]	0.56 [14.2]	4.3 [109.2]

NOTES:

Ground rod must be precrimped with U2CABT die set when PU998 die is used or for even higher mechanical resistance use special UPRECRIMP dies on ground rods. Precrimping of ground rod is not necessary when P1011 die is used. Install YGHR or YGLR on Hub Y. Hub Z is inserted into 1/2" rigid conduit. The conduit is driven into the earth to provide support and provide correct level of receptacle prior to cement pour.

TYPE YG-B

Bus Bar Connector

The BURNDY® YG14B2TC2C6C Compression Bus Bar Connector is ideally suited for cellular tower applications and is easier to use than exothermic connections. This high conductivity wrought copper connector allows attachment of the ground conductor to the ground bus with just one crimp using the BURNDY® Y750 HYPRESS™ hydraulic compression tool and the U1105 die set. This exclusive design allows the user to attach #2 AWG sol./str. and/or #6 sol./str. copper conductor to 1/4" thick copper bus bar. This connection is suitable using (1) or (2) conductors for power, grounding and bonding applications. UL Listed to both UL486 and UL467 (suitable for direct burial) ensures that this connector will meet the rigors of either application. Prefilled with PENETROX™ E compound and strip sealed.

* For continuous uncut conductor applications

NOTE:
Suitable for use with either (1) or (2) conductors (excluding YG14BTC28)

BURNDYWeld® QIKLITE™

BURNDYWeld® Weld Metal

Battery Ignition System

The self-contained unit offers a built-in battery life indicator, 6' ignitor cord and separate buttons for power and ignition. Also, no starting powder is used with this system so emissions are greatly reduced. QIKLITE™ works with "off-the-shelf" molds and weld metal, so contractors and installers can continue to use the same quality BURNDYWeld® products.

Since the unit operates with standard weld metal and molds, installers also have the option of using a traditional flint ignitor or the new QIKLITE™ system. Another feature is the speed of ignition, with virtually no delay between depressing the "push to operate" button and ignition of the weld metal. This instant ignition feature offers quick reassurance to the installer, without the delay.

200Q	10
250Q	10
500Q	10
QIKSTIK	10

Features & Benefits

- The QIKLITE™ system allows installers to make exothermic connections remotely
- Uses standard exothermic molds and weld metal
- Use the new BURNDYWeld® QIKLITE™ system or use a flint ignitor, this versatility makes this system better than anything available in the industry
- Installers have virtually 100% confidence that the connection can be completed with no wasted material or weld metal shots
- No starting material required - which greatly reduces the amount of emissions generated
- Power is supplied by 4 standard "D" Size batteries
- Built-in battery life indicator
- There's virtually no delay in ignition after depressing the "push to operate" button
- Separate ON/OFF and Operate buttons
- Comes complete with durable 6' heat resistant cord
- Durable, long-lasting design
- QIKSTIK ignitor sticks are conveniently packaged and available separately or available packaged complete with standard weld metal

BURNDYWeld® Weld Metal

BURNDYWeld® Weld Metal is packed in moisture-resistant plastic cartridges that have tight fitting caps. These cartridges, along with the necessary steel discs, are then packed in boxes that are hermetically sealed. This ensures the powder arriving in good condition, always dry and ready for fast positive ignition. BURNDYWeld® Weld Metal comes in several types; one for welding copper to copper, copper to steel, copper to rail, copper to cast iron and one for welding copper to steel for cathodic protection. The size and weight (in grams) of the cartridge are marked on each individual cartridge.

Weld metal and steel discs are sold only in standard box quantities.

Features & Benefits

- Packed in moisture-resistant plastic cartridges that have tight fitting caps. These cartridges, along with the necessary steel discs, are then packed in boxes that are hermetically sealed. This ensures the powder arriving in good condition, always dry and ready for fast positive ignition.

NOTES:

- For sizes not listed, contact BURNDY®
- Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors
- For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
- For expedited service, contact BURNDY®

Required Tools:

Handle Clamps - see chart for correct handle catalog number

Recommended Accessories:

- B38-0309-00** Flint Ignitor
- B38-3922-00** Mold Cleaning Brush
- B38-0135-00** Cable Cleaning Brush
- B38-0330-00** Cable Clamp

BCC-6 TYPE MOLDS

Horizontal Parallel Tap

BCC-6 Type Molds are used to join horizontal parallel tap to run connections. The tap cable is over the run cable. Size range is 10mm² through 120mm² for metric conductors. Contact BURNDY® for information on molds for conductors not listed below.

Cable Size (mm ²)		Mold Number	Price Key	Weld Metal	Handle Clamps

SINGLE SHOT MOLDS

RUS Accepted

BURNDYWeld[®] Single Shot Molds are an economical way to make cable connections onto the top of a ground rod. The Single Shot is a disposable single use ceramic mold that comes complete with everything required except the flint ignitor.

- For sizes not listed, contact BURNDY®
- Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors
- For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
- For expedited service, contact BURNDY®

Required Tools:

Handle Clamps - see chart for correct handle catalog number

Recommended Accessories:

B38-0309-00 Flint Ignitor
B38-3922-00 Mold Cleaning Brush
B38-0135-00 Cable Cleaning Brush
B38-0330-00 Cable Clamp

TYPE BCS-8 MOLDS

Horizontal Cable to Horizontal Steel Surface

Type BCS-8 Molds are used to terminate a horizontal copper cable to any horizontal steel surface. Note that the cable is ON the surface. Size range is 10mm² through 300mm² for metric conductors. Contact BURNDY® for information on molds for conductors not listed below.

NOTES:

- For sizes not listed, contact BURNDY®
- Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors
- For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
- For expedited service, contact BURNDY®

Required Tools:

Handle Clamps - see chart for correct handle catalog number

Recommended Accessories:

B38-0309-00 Flint Ignitor
B38-3922-00 Mold Cleaning Brush
B38-0135-00 Cable Cleaning Brush
B38-0330-00 Cable Clamp

① Sold complete with handles; **B38-0309-00** Flint ignitor included

- For sizes not listed, contact BURNDY®
- For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
- For expedited service, contact BURNDY®

NOTE: DO NOT use Type BCS-37 molds on Soil Pipe (ASTM A74-82).

A test weld should be made on a section of the pipe being used to determine the possibility of detrimental metallurgical effects

Required Tools:

Handle Clamps - see chart for correct handle catalog number

Recommended Accessories:

- B38-0309-00** Flint Ignitor
- B38-3922-00** Mold Cleaning Brush
- B38-0135-00** Cable Cleaning Brush
- B38-0101-00** Rasp
- B38-4129-00** Packing Material for 50 mm² & Larger Molds

TYPE BCB-33 MOLDS

Cable to Horizontal lug or bus

Type BCB-33 Molds are used for connecting copper cable to 2 hole lug. Size range is 25mm² through 240mm² metric copper conductors. Contact BURNDY® for information on molds for conductors not listed below.

NOTES:

- For sizes not listed, contact BURNDY®
- For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
- For expedited service, contact BURNDY®

Required Tools:

- B38-0101-00** Rasp

TYPE BBS-1 MOLDS

Vertical Tap to Vertical Steel Surface

Type BBS-1 Molds are used for a vertical tap connection to vertical steel surface. Size range is 2X20 mm² and 10x80 mm² for copper bus bars. Contact BURNDY® for information on molds for conductors not listed below.

Bus Bar Size (mm)	Mold Number	Price Key	Weld Metal	Handle Clamps
2 X 20	B-4066	4	65	B-106
2 X 25	B-4067	4	90	B-106

- B38-3922-00** Mold Cleaning Brush
- B38-0135-00** Cable Cleaning Brush
- B38-0330-00** Cable Clamp

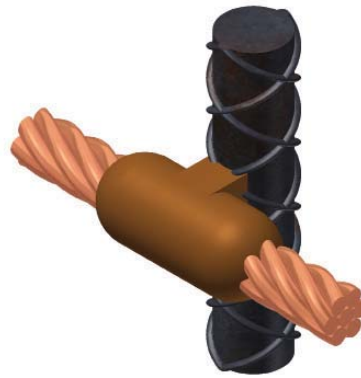

PACKING MATERIAL NOTE

A packing pad is necessary when making BURNDYWeld® connections to rebar. Packing material B38032900 is copper shim stock. Packing material numbers B38406100, B38406200 and B38406300 are a ceramic fiber material and can be used for **one** connection only. Be sure to specify packing material catalog number when ordering mold and weld metal.

TYPE BCRE-3 MOLDS

Horizontal through Cable to Vertical Rebar

Type BCRE-3 Molds are recommended for horizontal conductors to vertical rebar connections for metric conductors 25mm² through 95mm² joined to reinforcing bars 12mm through 22mm and larger. The high copper content joint has a higher current carrying capacity than the conductors being joined and is impervious to vibration and moisture. Contact BURNDY[®] for information on molds for conductors not listed below.

TYPE BCRE-6 MOLDS

Horizontal Cable Tap to Vertical Rebar

Type BCRE-6 Molds are recommended for horizontal conductors terminating at right angles to vertical rebar connections for solid or concentric stranded conductors 25mm² through 95mm² joined to reinforcing bars 12 through 22 and larger. The high copper content joint has a higher current carrying capacity than the conductors being joined and is impervious to vibration and moisture.

Contact BURNDY® for information on molds for conductors not listed below.

PACKING MATERIAL NOTE

A packing pad is necessary when making BURNDYWeld® connections to rebar. Packing material B38032900 is copper shim stock. Packing material numbers B38406100, B38406200 and B38406300 are a ceramic fiber material and can be used for **one** connection only. Be sure to specify packing material catalog number when ordering mold and weld metal.

① The **B106-32** comes complete with a **B-106** handle clamp and **B40-0106-76** vertical chain clamp. Although good for use on all sizes of rebar, vertical chain clamps are strongly recommended on large size rebar as they hold the mold to the rebar securely. If you already have a B-106 handle clamp, you can purchase the vertical chain clamps separately.

NOTES:

- For sizes not listed, contact BURNDY®
- Molds listed are for concentric stranded cable; add suffix "-S" to mold number for solid conductors
- For heavy duty molds, molds with wear plates or molds for Copperweld® cable, contact BURNDY®
- For expedited service, contact BURNDY®

- B38-0330-00** Cable Clamp

BURNDY® GROUNDMAX™

BURNDY® GROUNDMAX™

BURNDY® GROUNDMAX™ is an economical solution for areas with very difficult grounding issues. BURNDY® GROUNDMAX™ is highly conductive in a wet or dry application and does not require moisture to lower the resistance of your grounding system. BURNDY® GROUNDMAX™ contains a corrosion inhibitor which forms a film on copper, creating a barrier against corrosion. BURNDY® GROUNDMAX™ can be poured in dry or pumped in slurry form. No tamping required. It is very contractor friendly. No special tools required.

Advantages:

- Easy to install
- Electrically conductive
- Environmentally friendly
- Will not leach into the ground
- Positive low resistance, electrical connection to earth
- Does not contain any hazardous chemicals
- Compatible with all copper grounding systems
- Contains a corrosion inhibitor to protect copper
- Will not expand or shrink
- Not affected by freezing
- Excellent shelf life
- Typical resistivity <10 Ohm-cm

Material Required per Linear Foot of Trench

To calculate the pounds of material required to fill a trench:

- Determine desired thickness
- Move to the right on the chart above until you are under the known width of the trench - this number will be the weight of the material in lbs/linear ft
- Take this number and multiply by the length of the trench in feet; your answer will be the amount of BURNDY® GROUNDMAX™ material required to fill the trench to the desired level in pounds

Example:

Thickness = 6 inches
 Width of trench = 18 inches
 54.6 lbs per linear ft (see table above)
 Answer = 54.6 lbs per linear ft x 25 ft trench = 1,365 lbs of BURNDY® GROUNDMAX™
 = Quantity of 28 50-lb bags of BURNDY® GROUNDMAX™

Equivalent Metric Size given in []; Metric sizes provided for reference only.

BURNDY® GROUNDMAX™

Application Information

Vertical Installation

Drill or bore a hole the desired diameter and depth. Suspend ground electrode in center of hole to be filled. Pour BURNDY® GROUNDMAX™ until desired level is obtained. No tamping is required.

Dry Volume of BURNDY® GROUNDMAX™ vs. Hole Size		Ground Resistance Comparison of Bare Rod vs.	
Hole Size	Lbs. of BURNDY® GROUNDMAX™ Per Ft.	Hole Size with 5/8" x 10' Rod in Center of 15' Hole	Percent Resistance Compared to Rod Only (100%)
4"	6.5	4"	52%
6"	14.5	6"	47%
8"	25.8	8"	44%
10"	40.4	10"	42%
12"	58.1	12"	40%

Horizontal or Grid Construction ①

Pour into horizontal trench until level of ground wire is reached. Place ground wire. Pour additional BURNDY® GROUNDMAX™ until wire is covered to desired height. Cover with fill. No tamping required.

For grid construction, pour BURNDY® GROUNDMAX™ and spread over ground grid until desired thickness is achieved. Cover with fill.

① Entire grounding system should be surrounded by BURNDY® GROUNDMAX™. Conductors should be insulated as they exit BURNDY® GROUNDMAX™ column.

Steady State Leakage Resistance ② Using 4/0 Copper Wire vs. BURNDY® GROUNDMAX™					
Length	0.457" Diameter Wire Only	Percentage of Resistance with 0.457" Wire Plus BURNDY® GROUNDMAX™ in Various Diameters Compared to Wire Only (100%)			
		2"	3"	4"	6"
25'	100%	83%	78%	74%	69%
50'	100%	85%	81%	77%	73%
75'	100%	86%	82%	79%	75%
100'	100%	87%	83%	80%	77%
150'	100%	88%	84%	82%	78%
200'	100%	88%	85%	83%	79%
250'	100%	89%	85%	83%	80%
300'	100%	89%	86%	84%	80%

② The use of BURNDY® GROUNDMAX™ around the grounding system will also reduce surge impedance by increasing the effective contact area of the electrode to soil.

Horizontal Construction

Grid Construction

BURNDY® GRIDMAX®

Grounding, Personnel Safety Mats, Equipotential Bonding, Pool and Spa Grounding

Features & Benefits

- Manufactured from bare solid copper
- Spaced on 4", 6" or 12" centers
- Copper to copper weld with 6% silver
- Furnished in sections with lengths from 4' to 100'
- Easily and economically installed using BURNDYWeld®, HYGROUND® or our Mechanical connectors
- Sizes made specifically for the Pool and Spa market 3' x 100' and 3' x 50'. But can be used where any large area grounds are required

B-106 & B-107 HANDLE CLAMPS

BURNDYWeld® Handle Clamps make possible the use of many different sizes and types of molds with only two different clamps. The two handle clamps are catalog numbers **B-106** & **B-107**. These will fit 95% of all standard BURNDYWeld® molds.

1. Use B-106 clamps for all molds having a price key 4, 7, 17, 22 or 24. These molds are a nominal 3 1/8" x 3 1/8" square.
2. Use B-107 clamps for all molds having a price key 5, 6, 8 or 23. These molds are a nominal 4" x 4" square.
3. All molds having a price key 2, 3, 9, 10, 11, 12, 14, 15 or 16 have an attached frame; separate handles are not required.

B40-0106-75 HANDLE ATTACHMENT

This Handle Attachment is used to hold Price Key 14 molds in position. It easily attaches to the B-106 Handle Clamp. This Handle Attachment can be used with weld types BCRE-1 and BCRE-4.

Catalog Number: **B40-0106-75**

MOLD SUPPORT CLAMP

The Mold Support Clamp is used to hold a mold in position on a vertical steel column or angle. It is easily attached to the Handle Clamps. The Mold Support Clamp can be used with weld types BCS-3, BCS-18, BCS-23 and BCS-27.

Catalog Number: **B40-3657-00**

VERTICAL MAGNETIC CLAMPS

Magnetic Clamps are used to hold a mold in position on a vertical steel surface. The magnetic clamp can be purchased complete with B-106 Handle Clamps or if you already have a set of handle clamps, you can order just the magnetic mounting assembly. The mounting assembly can easily be mounted on the prongs of your existing B-106 handle clamps. A minimum of 10" is required.

Magnetic Clamps with B106 Handle		
Catalog Number	Fits Molds w/ Price Key	For Use with Weld Types
B40-4431-00	4 & 17	BCS-3, 4, 7 & 23

Magnetic Clamp Only		
Catalog Number	Fits Handle Clamps	For Use with Weld Types
B40-4431-01	B-106 & B-107	BCS-3, 4, 7 & 23

HORIZONTAL & VERTICAL CHAIN CLAMPS

BURNDYWeld®

Chain Clamps are used to hold a mold in position on horizontal or vertical pipe up to 4" in diameter. For larger pipe a 20" chain extension is available to allow the chain clamps to be used on pipe up to 10" in diameter. The chain clamp can be purchased complete with B-106 or B-107 Handle Clamps or if you already have a set of handle clamps, you can order just the chain clamp and mounting assembly. The mounting assembly can be easily attached to your existing handle clamps. 20" Chain Extension catalog number: B40-0106-27.

BURNDYWeld® ACCESSORIES

B38-0330-00 Cable Clamp

The BURNDYWeld® Cable Clamp is recommended for holding a wide range of cables properly in place in molds when welding cables that are under tension. This prevents the cables from pulling out of the mold when the weld is made.

B38-0330-00

Cable Cleaning and Card Cloth Brush

The Cable Cleaning Brush is recommended for cleaning heavily oxidized cables. The V-shape brushes permit their use over a wide range of cable sizes. Brush assembly consists of a handle with two stiff wire bristle brushes that are rotatable, for longer life and are replaceable.

B38-0135-00

B38-0306-00

The Card Cloth Brush is used for cleaning large conductors and bus bar. It has short stiff bristles. These brushes are for cleaning cable only, not molds.

The Mold Cleaning Brush **B38-3922-00** is used to clean the graphite mold without scratching the mold.

Description	Catalog Number
Cable Cleaning Brush	B38-0135-00
Replacement Brush	B38-0135-01
Card Cloth Brush	B38-0306-00
Mold Cleaning Brush	B38-3922-00

B38-3922-00

Mold Cleaners

Mold Cleaners are used to clean the slag from molds that are not split through the crucible.

B40-0319-01 for cartridge sizes #15 through #65

B40-0319-03 for cartridge sizes #90 through #500

Packing Material

Packing material is used to prevent the molten weld metal from leaking out of the mold. When the cable opening becomes worn from heavy use, the packing material may be used to prolong mold use. It is also used around 7 strand cable to prevent leaking. Packing material comes in a 1 lb. or 5 lb. package.

Description	Catalog Number
1 lb. package	B38-4129-00
5 lb. package	B38-4129-05

B38-0305-00

BURNDYWeld® Tools

- B38-0309-00** Flint Ignitor
- B38-0304-00** 8" File
- B38-0307-00** Crimping Tool
- B38-3922-00** Mold Cleaning Brush
- B38-0308-00** 6" Screwdriver
- B38-0305-00** Wire Brush
- B38-0101-00** Rasp
- B38-0306-00** Card Cloth Brush

B38-0101-00 Rasp

This tempered steel, curved rasp is recommended for removing rust and mill scale from steel and cast iron surfaces. The blade is replaceable. To order replacement rasp blade, specify catalog number **B38-0101-01**.

Not recommended for use on galvanized surfaces.

B38-0309-00 Flint Ignitor

The **B38-0309-00** Flint Ignitor is used to ignite the starting powder. Each mold that is sold with a frame has a Flint Ignitor included. For added safety a Flint Ignitor extension is available, catalog number **B38-0904-00**, that attaches to the **B38-0309-00** Flint Ignitor. This allows installers to stay approximately 36" away from the mold.

To order replacement flints, specify part number **B38-0309-01**.

Ground Rod Driving Sleeves

Ground Rod Driving Sleeves are placed over the top of a ground rod while driving it into the ground. This prevents the top from mushrooming or flaring out. Ground rod driving sleeves are available in sizes to fit all standard unthreaded ground rods.

Catalog Number	For Use On
B38-3662-01	1/2" Copper Clad or Steel Ground Rod
B38-3662-02	5/8" Copper Clad Ground Rod
B38-3662-05	5/8" Steel Ground Rod
B38-3662-03	3/4" Copper Clad Ground Rod
B38-3662-06	3/4" Steel Ground Rod
B38-3662-04	1" Copper Clad Ground Rod

SHIM STOCK AND ADAPTER SLEEVES

BURNDYWeld® molds designed for larger cable sizes can be used on smaller diameter cables if copper adapter sleeves or shim stock are utilized. The copper shim stock, .0108" x 1-1/2" x 3", is normally wrapped around cable until the diameter is about equal to the cable opening. A tight fit is not necessary as the shim stock will unwrap slightly and prevent leakage of weld metal. To order shim stock use part number **B38-0329-00**. Shim stock comes 100 pieces per box.

For Use on Cable Size		Part Number	Use in Mold Size	Sleeve Dimensions

TROUBLE SHOOTING TIPS

PROBLEM	PROBABLE CAUSE	CORRECTION TO MAKE
Insufficient metal to make weld.	Worn mold resulting in leaking weld metal.	Replace mold. If only worn around conductor opening, use duct seal around conductor. Do not get duct seal into mold cavity.
	Wrong size cartridge for mold.	Check ID plate for mold and compare with number on bottom of cartridge.
	Too much spillage when dumping powder.	Carefully open lid while holding over crucible and dump.
	Wrong mold for conductor being used.	Replace with correct mold. In some applications, shim stock or adapter sleeves can be used to enlarge cable to fit mold.
Mold does not close tightly causing weld metal to leak out.	Handle clamps not properly adjusted.	Remove cotter pin between the handles of the mold and adjust handle tension by backing out the eye bolt.
	Dirt or slag stuck in parting line of mold.	Clean mold thoroughly between connections.
	Bent or out-of-round cable.	Straighten or cut out bad section of cable.
Handle clamps will not lock closed.	Handle clamps not properly adjusted.	Remove cotter pin between the handles of the mold and adjust handle tension by backing out the eye bolt.
Excessively high weld, bubbly or gassy appearance, poor weld.	Moisture in mold.	Pre-heat mold to above 220°F with a propane torch, or ignite a sacrificial shot in mold with pieces of scrap conductor in it. If it is a horizontally split mold, shoot 3/4 of the recommended cartridge to make sure you do not lock up mold.
	Oil, grease, moisture or foreign material on conductors.	Pre-heat conductors with propane torch then use a clean wire brush on conductor to remove any residue left on conductors. If welding to cast iron or steel surface, weld area must be cleaned down to bright metal.
	Duct seal in weld cavity.	Take special precautions to keep duct seal out of weld cavity.
	Weld powder has gotten wet.	Replace with fresh, dry weld powder.
Weld metal blows out top of mold.	Mold worn or chipped around disc seal allowing powder to leak into mold cavity.	Replace mold.
	Forgot to use steel disc or did not seat it properly at bottom of crucible.	Make sure disc is seated at bottom of crucible before pouring the powder into crucible.

TROUBLE SHOOTING TIPS
(continued)

PROBLEM	PROBABLE CAUSE	CORRECTION TO MAKE
Cannot ignite powder.	Insufficient starting powder in ignition pocket on mold lid.	Place at least half of starting powder in ignition pocket of mold lid. Use all starting powder for each connection.
	Flint ignitor not shooting enough spark.	Clean flint ignitor according to directions on box or replace flint ignitor.
	Starting powder lumped together.	Break up starting powder on lid with edge of powder tube.
	Starting powder has gotten wet.	Remove shot from mold and replace with a dry cartridge.
Mold wearing out too fast.	Improper cleaning of mold.	Use mold cleaner, soft natural bristle brush or clean rag to clean mold between shots. Do not use wire brush or screwdriver on molds.
	Bent or out of round cable causes chipping and premature wear of mold.	Use caution when closing mold. Do not force mold shut around bent, twisted or out of round conductors.
Poor weld to ground rod.	Weight of mold not supported during reaction causing mold to slip when cable melts.	Use locking pliers on ground rod under mold to support the weight of the mold during the reaction.
	Moisture or contaminant on cable or ground rod.	Pre-heat conductors with propane torch then use a clean wire brush on conductors to remove any residue left on conductors.
Weld will not stick to steel surface.	Improperly cleaned area on steel.	An area larger than the weld area should be cleaned down to bright clean metal.
	Moisture or contaminant on cable or ground rod.	Pre-heat conductors with propane torch then use a clean wire brush on conductors to remove any residue left on conductors.
	Cable is improperly positioned in mold, blocking the flow of weld metal.	Position cable in mold in accordance with directions for mold. If directions are not available, position top of cable in the center of where the liquid weld metal hits the steel.
Weld will not stick to cast iron surface.	All causes listed under "Weld will not stick to steel surface" also apply to cast iron also.	[See Weld will not stick to steel surface cause/correction also]
	Not using CI (Cast Iron) powder.	Specify "CI" behind cartridge when ordering powder (i.e., 25CI).
Cable pulls out of mold when it is fired.	Cables are either twisted or under tension.	Use B38-0330-00 cable clamp or other method to remove tension. Cut out severely twisted cable.

**TYPES PENETROX™
A, A-13, E AND HT**

**OXIDE-INHIBITING
JOINT COMPOUNDS**

PENETROX™ oxide-inhibiting compounds produce low initial contact resistance, seal out air and moisture, prevent oxidation or corrosion, exhibit superior weathering characteristics, are usable over wide temperature ranges, and provide a high conductivity “gas-tight” joint. All PENETROX™ compounds contain homogeneously suspended metal particles. The suspended metal particles assist in penetrating thin oxide films, act as electrical “bridges” between conductor strands, aid in gripping the conductor, improve electrical conductivity and enhance the integrity of the connection.

The specially formulated PENETROX™ compounds are for use with compression and bolted connectors providing an improved service life for both copper and aluminum connections. Additionally, the nontoxic compounds are an excellent lubricant for threaded applications reducing galling and seizing.

PENACARTRIDGE

PENACARTRIDGE is a 1 lb. cartridge filled with PENETROX-A. It's designed to fit standard caulking guns for easy insertion into transmission and distribution connectors. Additionally, this packaging design provides a convenient method for applying PENETROX™ to many different applications.

PENETROX™ A-13

PENETROX™ A-13 is a synthetic base compound with evenly suspended zinc particles. It is recommended for aluminum to aluminum, aluminum to copper connections plus aluminum conduit threads. It is compatible with rubber, polyethylene and other insulating materials. UL Listed for all voltages.

PENETROX™ A

PENETROX A is a natural (petroleum) base compound with evenly suspended zinc particles. It is recommended for aluminum to aluminum, aluminum to copper connections and aluminum conduit threads. It is not recommended for use with rubber or polyethylene insulated conductors. UL Listed to 600V.

PENETROX™ E

PENETROX™ E is a synthetic base compound with evenly suspended copper particles. It is recommended for copper to copper, copper threads and all grounding applications. UL Listed.

PENETROX™ HT

PENETROX™ HT is a synthetic silicone based compound with evenly suspended zinc particles and nickel-aluminum alloy particles. It is recommended for aluminum to aluminum connections. It is compatible with rubber. Designed for use with High Temperature ACSS and ACCC connectors. Not UL Listed.

Equivalent Metric Size given in []; Metric sizes provided for reference only.

PENETROX™ A, A-13, E AND HT

TECHNICAL INFORMATION

PENETROX A

PENETROX A consists of a natural (petroleum) base vehicle in which zinc particles are suspended. For aluminum to aluminum, aluminum to copper applications and aluminum conduit threads. It is not recommended for use with rubber and polyethylene insulated conductors. UL Listed to 600 volts.

PENETROX A-13

PENETROX A-13 consists of a non-petroleum base vehicle in which zinc particles are suspended. Recommended for aluminum to aluminum, aluminum to copper applications and aluminum conduit threads. Compatible with insulating materials such as rubber, or polyethylene. UL Listed and recommended for all voltages.

PENETROX E

PENETROX E consists of a non-petroleum base vehicle in which copper granules are suspended. Recommended for copper to copper applications, grounding and for use on copper conduit threads. UL Listed to 600 volts.

PENETROX HT

PENETROX HT consists of a non-petroleum base vehicle in which zinc and nickel-aluminum particles are suspended. Recommended for use with aluminum to aluminum High Temperature rated ACSS and ACCC conductors. Not UL Listed.

Easy to apply:

1. Scratch brush the conductor surfaces until bright and clean.
2. Immediately apply PENETROX™ to the conductive surfaces.
3. For EHV applications, remove all excess PENETROX™ after installation is complete.

SHELF LIFE

When stored in its original container in cool (under 100°F) dry environment, PENETROX™ oxide inhibiting compound will remain workable and functional for 5 years from the Date of Manufacture (MO) marked on the container.

PROPERTIES OF PENETROX™

Property	Value PENETROX™ Definition	PENETROX™ HT	PENETROX™ E & A13	PENETROX™ A
Penetration (Unworked)	The value in accordance to ASTM D217 indicates the consistency of a grease. The higher the number, the softer the grease.	240	250	230
Dropping Point (Minimum)	The temperature at which the grease passes from the semi-solid to a liquid state under test conditions.	>580° F	350° F	230° F
Pour Point (Maximum)	The lowest temperature at which the compound will flow. Pour point is the lubricant's ability to perform in cold conditions.	-58° F	-40° F	-15° F

* MSDS sheets available through customer service.

HARDWARE DATA

RECOMMENDED TIGHTENING TORQUE

The hardware used in connectors must be compatible with the connector material, have high mechanical strength and be corrosion resistant and correspond to NEMA recommendations.

Copper alloy connectors have hardware made of DURIMUM™, which is BURNDY's trade name for silicon bronze alloy ASTMB99 type B. This material was first introduced by BURNDY® in 1927 for use in outdoor construction, and today, is the standard throughout the industry.

DURIMUM™ and Steel Hardware		Aluminum Hardware	
Bolt Size	Rec. Torque (Inch Pounds)	Bolt Size	Rec. Torque (Inch Pounds)
1/4 - 20	80	1/2 - 13	300
5/16 - 18	180	5/8 - 11	480
3/8 - 16	240	3/4 - 10	650
1/2 - 13	480		
5/8 - 11	660		
3/4 - 10	1,050		

Aluminum connectors generally have aluminum alloy hardware. The bolts are 2024T4 and anodized to resist corrosion. The nuts are 6061T6, which is resistant to corrosion and does not require anodizing. Both nuts and bolts are lubricated to eliminate galling and to provide consistent clamping forces.

To reduce or greatly exceed the recommended torque can adversely affect the performance of the connector.

DURIMUM™ BOLT

SILICON BRONZE

BURNDY® introduced silicon-bronze bolts, nuts and other hardware items on outdoor connector applications in 1927. Today the DURIMUM™ trademark is a standard for this use. DURIMUM™ bolts combine high strength with corrosion resistance. Heads have American Standard dimension and the threads are per American National Coarse Series, Class #2 fit. The silicon bronze is per ASTM B99.

TYPE TMH

DURIUM[™] SILICON BRONZE HARDWARE KITS

Type TMH are DURIUM[™] silicon bronze hardware kits. The kits can be ordered for specific applications ensuring the proper type and amount of hardware for each installation. Packaged in separate sealed bags, they are convenient to use, eliminating mismatched quantities. DURIUM[™] silicon bronze material provides long lasting corrosion resistance Grade 2.

Catalog Number	Size	Each TMH Kit Includes:					Working Range (R)	Installation Torque (In-lbs)
		Bolt		Flat Washer	Split Washer	Hex Nut		
		Length	Qty					
TMH262	1/4-20	0.75	2	4	2	2	0.09 - 0.34	80

BELLEVILLE WASHERS

Any bolted "pad to flat" electrical connection should include a bolt, two flatwashers, and the nut. In addition, if any of the flat components is aluminum, a properly designed Belleville washer should be interposed between one of the flatwashers and either the bolt head or the nut, with the hollow of the Belleville washer placed against the flat washer. BURNDY® Stainless Steel Belleville washers are designed to maintain substantial force when tightened to NEMA-recommended values and finely finished to avoid galling.

Installation Tools

The BURNDY[®] Engineered System features the most complete line of installation tools in the electrical industry. Available in various styles: battery actuated, mechanical, full cycle ratchet, self contained hydraulic, remote controlled hydraulic, along with power actuated pumps, hoses and accessories. BURNDY has the options to suit your needs. BURNDY tools are designed to integrate with the complete line of BURNDY connectors. Whether you're a small contractor working with #22 wire or a large utility working with 2500 kcmil conductor, there is a BURNDY tool available to do the job.

The benefits of the BURNDY[®] Engineered System are many, however, probably the most significant benefit is reliability. There is nothing more important to the electrical industry today than reliability. It represents the one area that leads to economical installations that will endure for the life of the installation.

Tool Center

An important element of the BURNDY[®] Engineered System is the BURNDY Tool Center, located at 150 Burndy Road, Littleton, NH 03561 (800-426-8720 or 603-621-4499). This center provides advice and information on the operation, maintenance and repair of BURNDY tools. The repair center is staffed with specialized technicians who provide the best possible service for all BURNDY tools, pumps and accessories.

BURNDY designed and produced the first self contained hydraulic compression electrical connector installation tool in 1934. In our continuing efforts to provide the highest quality and highest value connection systems, we offer the current BURNDY tool policy.

Limited Warranty

The majority of BURNDY tools are warranted to be free of defects in materials and workmanship for a period of five (5) years from the date of shipment. See specific tool page for length of warranty. If inspection by a certified technician shows the trouble is caused by defective workmanship or material, BURNDY will repair or (at our option) replace the tool.

This Warranty does not apply where:

- Repairs or alterations have been made or attempted by others
- Repairs are required because of normal wear and tear
- The tool has been abused, misused or improperly maintained
- The use of any non-BURNDY product has resulted in damage to the tool

Repair Policy

All non-warranty repaired tools are completely reconditioned and receive a limited 1-year warranty. Non-warranty repair returns tools to like-new condition at a maximum cost of 40% of a new tool. A nominal service charge of \$5 is applied to all repairs to cover shop supplies, oil disposal and other miscellaneous services not covered as part of the standard repair.

If the decision is made not to repair, a handling charge of \$25.00 will be applied plus return freight costs.

Return Procedure

All tools sent to the BURNDY Tool Center or an authorized repair center must be accompanied by a purchase order with detailed bill to and ship to address authorizing repair. Requests for repair charges before work is done must be stated on the purchase order. All tools sent to the BURNDY Tool Center or an authorized repair center as a warranty claim must be accompanied by a proof of purchase such as a BURNDY invoice or invoice from any BURNDY distributor.

All tools must be shipped at the owner's expense, prepaid. BURNDY pays for the return freight, same surface freight as received. Airfreight returns will be returned same way collect for non-warranty repair and prepaid for warranty repairs.

This warranty and repair policy supercedes all previous policies and is in effect as of January 1, 2005.

12-Ton U Dies*

For Y35, Y39, Y750, PAT750 Series
PAT46 Series (with PUADP1 Adapter)

* Non-tension U-type 12 ton dies for YA, YS, YA-A, YS-A style connectors

** Wide dies are intended for use on long barrel terminals and splices (YA/YS) only.

Die Sets sold separately; U Die Kits also available; see following page

U5CRTW Wide Die Set

PT29291 die box is available (sold separately) holding up to 15 "U" style (standard or wide) die sets; dies not included.

U Die Kits

For Y35, Y39, Y750, PAT750 Series PAT46 Series (with PUADP1 Adapter)

UDIEKITCU and **UDIEKITAL** include 15 sets of “U” dies and die case. These stainless steel color coded dies are for crimping YA, YS, YA-A, and YS-A types of connectors, ranging from #6 AWG through 750 kcmil.

UDIEKITCUW includes 9 sets of wide stainless steel color coded dies for crimping long barrel YA and YS types of connectors up to 4/0 AWG. The wide dies require only one crimp compared to 2 for the standard width dies.

UDIEKITHYGRD includes 8 dies sets. Seven die sets are used to install the BURNDY® HYGROUND® irreversible compression grounding connectors; the U2CABT die set is for pre-crimping 1/2”, 5/8” and 3/4” ground rods for increased rotational resistance. The UDIEKITHYGRD also includes the PT29291 die case.

UDIEKITHYGRD includes
UC, UO, U997, PU998, U1011, U1104, U1105, U2CABT (Ground rod pre-crimp die), and PT29291 die case

W Dies

For MD6, MD7, Y500CTHS, PAT500SJ, PAT600, PATMD6 and CSMD Series of tools

* These sizes (250 - 500) for Y500CTHS, MD734, and MD734R only.

** For PAT600 and PAT500SJ series and Y500CTHS only.

Note: N/A = not applicable

Suitable for use on YA, YS, YA-A, YS-A type non-tension connectors.

Die Sets sold separately; W Die Kits also available; see following page

PATCUT245LI

Latch Head, Cu/Al up to 2.45" O.D.
Hydraulic Self-Contained Cutter 18V Lithium-Ion

- 180° head rotation
- Cuts up to 2.45" diameter copper/aluminum cable
- Specialized latch style cutting head for interference-free closure for mid-span work
- Ergonomic design, overmolded handle
- Includes 2 batteries, charger, and polymer carrying case

For Use On:

Copper/Aluminum Cable:
Up to 2.45" O.D.

For Copper and Aluminum cable only. Do not cut steel, ground rod, rebar or guy wire.

Variations:

PATCUT245LIDC Tool with 12/24V-DC charger in place of AC charger

Ni-MH platform is also available:

- PATCUT245CUAL18V** Ni-MH battery version
- PATCUT245CUAL18VDC** Ni-MH battery version with 12/24V-DC charger in place of AC charger
- PATCUT245CUAL18V250V** Ni-MH battery version with 240/250 V-AC Charger

Specifications:

Output Force:	6 Tons
Tool Weight:	13.7 lbs
Size:	18.13" x 13.50" x 3.50"
Operating Voltage:	18 V-DC Lithium-Ion
Recharge Time:	30 minutes
Warranty:	5 year limited warranty (excluding blades) Lifetime warranty on INFINITY DRIVE® 1 year on batteries and charger

Accessories:

- BAT18VLI:** Hi-capacity LI battery (3.0 AH)
- PATCHGRLI:** 120V-AC Charger
- PATCHGRLIDC:** 12/24V-DC Charger
- PT208620:** Lanyard
- PT10038657:** Replacement Moving Blade
- PT10040663:** Replacement Fixed Blade

BCC1000CUAL

Sealed Nickel Cadmium Cutter

Cuts up to 750 kcmil hard drawn copper;
1000 kcmil soft drawn copper; 2" O.D. aluminum

- Hook head design
- Three-way switch
- Hardened steel blades
- Withstands rugged use, resists oil and solvents
- Includes 1 battery, 1 charger, and case

For Use On:

Hard Drawn Copper:

750 kcmil

Soft Drawn Copper:

1000 kcmil

Aluminum:

up to 2" O.D

Do Not Cut Steel or ACSR

Specifications:

Tool Weight:	6.0 lbs
Size:	14.50" x 4.50" x 4.00"
Operating Voltage:	12 V-DC Nickel Cadmium
Recharge Time:	1 hour (fast) to 16 hours (standard)
Warranty:	90 day limited warranty (excluding blades)

Accessories:

BCCBAT12V:	Sealed nickel cadmium battery
BCCCHGR:	120 V-AC Charger
BCCCASE:	Replacement Case for BCC1000CUAL tool
RP50RP03:	Replaceable Moving Blade
RP50RP02:	Replaceable Fixed Blade

RHCC4CUAL

Scissor Action, Remote Operated Cutter Cuts up to 4.00" Copper / Aluminum Cable

- Specialized scissor head design for interference free closure for mid-span cuts
- High strength hardened steel cutting blades
- 360° swivel hose fitting
- Stainless Steel lifting assist eyebolt
- Light weight ergonomic design

For Use On:

Copper/Aluminum Cable: up to 4.00"

Specifications:

Operating Pressure:	10,000 PSI
Weight:	19.9 lbs
Size:	21.29" x 9.13" x 5.15"
Warranty:	5 year limited warranty (excluding blades)

BAGCNVS5X9X24 Canvas Bag available separately
(included with tool)

Accessories:

BAGCNVS5X9X24:	Canvas Bag (included with tool)
RHCC4CUALBLD:	Cutting Blade (one blade; 2 required)
RHCC4CUALGDEBLD:	Blade Guide

See Hydraulic Pumps and Hydraulic Hoses; Pump Accessories for other necessary equipment.

RHCC129ACSR

Latch Head, Remote Operated Cutter

Cuts up to 1.29" Copper / Aluminum Cable

- Interference free closure for mid-span cuts
- Precision cutting blades for clean cuts
- High strength steel cylinder
- Light weight, ergonomic design
- Durable canvas carrying bag stores tool and accessories

For Use On:

Copper/Aluminum Cable: up to 1.29"

ACSR: up to 1113 kcmil

Ground Rod: up to 5/8"

Rebar: up to 1/2"

Soft Steel Bolts: up to 5/8"

Standard Guy: up to 1/2"

EHS Guy Strand: up to 3/8"

Specifications:

Operating Pressure:	10,000 PSI
Weight:	5.8 lbs
Size:	11.25" x 3.75" x 3.00"
Warranty:	5 year limited warranty (excluding blades)

Accessories:

PT10043890:	Canvas Bag (included with tool)
PT10037388:	Moving Blade
PT10037384:	Fixed Blade
RHCCHSA:	Hot Stick Adapter

See Hydraulic Pumps and Hydraulic Hoses; Pump Accessories for other necessary equipment.

PT10043890 Canvas Bag available separately (included with tool)

RHCC245CUAL

Latch Head, Remote Operated Cutter

Cuts up to 2.45" Copper / Aluminum Cable

- Interference free closure for mid-span cuts
- Precision cutting blades for clean cuts
- Lightweight ergonomic design
- Durable canvas carrying bag stores tool and accessories

For Use On:

Copper/Aluminum Cable: up to 2.45"

PT10054094 Canvas Bag available separately (included with tool)

Specifications:

Operating Pressure:	10,000 PSI
Weight:	8.3 lbs
Size:	14.87" x 4.75" x 3.00"
Warranty:	5 year limited warranty (excluding blades)

Accessories:

PT10054094:	Canvas Bag (included with tool)
PT10038657:	Moving Blade
PT10040663:	Fixed Blade
RHCCHSA:	Hot Stick Adapter

See Hydraulic Pumps and Hydraulic Hoses; Pump Accessories for other necessary equipment.

YCUT129ACSR

Latch Head Style

Hydraulic Hand Operated Cutter

- Rapid advance pump
- Handle trigger drain
- Interference free closure on mid-span cuts
- 180° head rotation

For Use On:

Copper/Aluminum Cable: up to 1.29"

ACSR: up to 1113 kcmil

Ground Rod: up to 5/8"

Rebar: up to 1/2"

Soft Steel Bolts: up to 5/8"

Standard Guy: up to 1/2"

EHS Guy Strand: up to 3/8"

Specifications:

Output Force:	7 Tons
Weight:	11.4 lbs
Size:	22.50" x 6.63" x 2.50"
Warranty:	5 year limited warranty (excluding blades)

Accessories:

PT10024162:	Carrying Case (included with tool)
PT10037388:	Moving Blade
PT10037384:	Fixed Blade

PT10024162 Hard Polymer Case for YCUT129ACSR

MCC Series

Manual Cable Cutters

MCC600 cuts to 600 kcmil Cu/Al;

MCC1000 cuts to 1000 kcmil Cu/Al

- Rugged, high quality steel cutting blades
- Fiberglass handles with soft grips
- Excellent cutting edge performance
- Minimum of cable distortion

For Use On:

Copper/Aluminum Cable: up to 600 kcmil (MCC600)
up to 1000 kcmil (MCC1000)

Variations:

MCC600	3.5 lbs; 21" overall length; cuts copper and aluminum cable to 600 kcmil; max. insulation diameter 1.31"
MCC1000	9.0 lbs; 32" overall length; cuts copper and aluminum cable to 1000 kcmil; max. insulation diameter 1.90"

Specifications (MCC600):

Weight:	3.5 lbs
Size:	21.00 x 5.00" x 2.00"
Max. Insulation Dia.:	1.31"
Warranty:	1 year limited warranty (excluding blades)

Accessories:

MCC600BLADESET:	Replacement blades for MCC600
MCC1000BLADESET:	Replacement blades for MCC1000

RCC - Cu/Al

RCC-Series Ratchet Cutters for Cu/Al

Three variations covering a range of Cu/Al

- Rugged, high quality steel cutting blades
- Excellent cutting edge performance
- Minimum of cable distortion

For Use On:

- RCC600E:** Copper & Aluminum 600 kcmil
- RCC750HD:** Copper & Aluminum 750 kcmil
- RCC1000:** Copper & Aluminum 1000 kcmil

Variations:

- RCC600E** 10.5" overall length; cuts copper and aluminum cable to 600 kcmil; max. insulation diameter 1.05"; 1.3 lbs
- RCC750HD** 10.5" overall length; cuts copper and aluminum cable to 750 kcmil; max. insulation diameter 1.62"; 2.4 lbs
- RCC1000** 20" overall length; cuts copper and aluminum cable to 1000 kcmil; max. insulation diameter 2.38"; 5.0 lbs

Specifications (RCC600E):

- Weight:** 1.3 lbs
- Length:** 10.50" x 4.25" x 1.75"
- Max. Insulation Dia.:** 1.05"
- Warranty:** 1 year limited warranty (excluding blades)

Accessories:

- RPC701302:** Fixed Replacement Blade for RCC1000
- RPC701402:** Moveable Replacement Blade for RCC1000

RCC - Cu/Al & ACSR

RCC-Series Cutters for Cu/Al and ACSR

Three variations covering a range of Cu/Al and ACSR

- Quick release, bi-directional ratchet mechanism
- Rapid blade advance
- Easy cutting with minimal cable distortion

For Use On:

RCC954ACSR1K: Copper 1000 kcmil;
Aluminum 1000 kcmil;
ACSR 954 kcmil

RCC556: Copper 500 kcmil;
Aluminum 500 kcmil;
ACSR 556 kcmil

RCC336: Copper 350 kcmil;
Aluminum 500 kcmil;
ACSR 336 kcmil

Variations:

RCC954ACSR1K 22.75" overall length; 1.38" max. insulation diameter; 6.5 lbs

RCC556 20" overall length; 1.25" max. insulation diameter; 4.5 lbs

RCC336 10.5" overall length; .74" max. insulation diameter; 1.2 lbs

RCC954ACSR1K

Specifications (RCC954ACSR1K):

Weight:	6.5 lbs
Size:	22.75" x 7.00" x 1.88"
Max. Insulation Dia.:	1.38"
Warranty:	1 year limited warranty (excluding blades)

Accessories:

RPC705501:	Fixed Replacement Blade for RCC556
RPC705601:	Moveable Replacement Blade for RCC556
RPC902101:	Fixed Replacement Blade for RCC336
RPC902201:	Moveable Replacement Blade for RCC336

Y10AC9

Electric Hydraulic Pump; 10,000 PSI

Light weight, space saving design

- Easy to carry and transport
- Factory set relief valve
- 100,000+ life cycles
- Sealed electric pendant switch with 10-foot cord

For Use With:

Y10AC9: 10,000 PSI electric pump
Used with: Y34BH, Y35BH, Y35BH4, Y39BH, Y45, Y46, Y46C, Y750BHXT, Y750CBHXT, Y644MBH, Y4PC834MBH, Y81KFTMBH, Y60BHU, Y60LW, RHCC Series Cutters

Variations:

Y10AC9OEM Electric hydraulic pump with foot switch; pump features "Jog & Hold"

Examples of one remote crimping head for use with Y10AC9 pump

RHCC129ACSR

Specifications:

Weight: 28.0 lbs (including oil)
Motor: 115V-AC 50/60 Hz 5/8 HP, 10,000 RPM
Height: 14.38"
Base: 18.00" x 8.75" x 6.50"
Max. Current Draw: 11 amp
Reservoir Volume: 1.61 quarts
Warranty: 5 year limited warranty

Accessories:

YACCASE: Steel carrying case with handle and locking latch
YACFC: Foot control switch

See Hydraulic Hoses; Pump Accessories for Hose options

EPP10

Electric Hydraulic Pump; 10,000 PSI

Also available in 6,000 PSI

- Lightweight, small size
- 100,000+ life cycles
- Durable remote pendant switch

Variations / For Use With:

EPP10: 10,000 PSI electric pump
Used with: Y34BH, Y35BH, Y35BH4, Y750BHXT, Y750CBHXT, Y39BH, Y45, Y46C, Y46, Y60BHU, Y60LW, Y644MBH, Y4PC834MBH, Y81KFTMBH, RHCC Series Cutters

EPP6: 6,000 PSI electric pump
Used with: Y29BH, Y35L

Example of one of the remote crimping heads for use with EPP10 pump

Y750BHXT

Specifications:

Motor:	115V-AC/60 Hz 1/2 HP @ 3450 RPM
Max. Current Draw:	12.5 amperes
Weight:	30.0 lbs
Base:	18.00" x 8.00" x 6.00"
Height:	16.00"
Reservoir Volume:	2 quarts
Warranty:	5 year limited warranty

Accessories:

- EPPCASE1:** Steel carrying case with handle, locking latch
PT9711: Pendant switch

See Hydraulic Hoses; Pump Accessories for Hose options

Specifications for BURNDY[®] HYGROUND[®] Connector System

Ground Connectors

1.0 Scope

- 1.1 This specification establishes the material, design, marking and performance requirements of compression grounding connectors used to make permanent ground connections for direct burial, embedment in concrete, or for above grade applications.
- 1.2 The specification also provides the requirements for mechanical connectors intended for bonding applications within the grounding network.

2.0 Materials

- 2.1 All ground connections shall be made using BURNDY[®] HYGROUND[®] compression ground connectors.
- 2.2 Compression ground connectors shall be manufactured from pure wrought copper in compliance with ASTM B187.
- 2.3 Mechanical cast connectors are allowed for bonding applications and shall be manufactured from a copper alloy of minimum 80% copper, according to ASTM B30.

3.0 Design

- 3.1 All ground connectors must be designed for fault-duty loading, and must have the fault capacity of the maximum sized conductor for which it is designed.
- 3.2 Pad terminals and in-line splices may accommodate only one conductor size. All other ground connectors must be range taking.
- 3.3 Structural steel and bus bar ground connectors may accommodate only one rigid member conductor.
- 3.4 All ground connectors must be provided with a corrosion-inhibiting compound preapplied to the contact surfaces. The compound must be compatible with the conductors accommodated by the connector.
- 3.5 All ground connectors must be capable of being provided with tin plating, if required by agency jurisdiction or by the application.
- 3.6 All mechanical bonding connectors must be designed to withstand 150% of the recommended installation torque.

4.0 Marking

- 4.1 All connectors must be clearly and permanently marked with the following information:
 - 4.1.1 Manufacturer's inspection symbol
 - 4.1.2 Catalog number
 - 4.1.3 Conductor accommodation(s)
 - 4.1.4 Installation die index or die catalog number (compression)
 - 4.1.5 Underwriters Laboratories Listing Mark/CSA Certification Mark
 - 4.1.6 The words "Suitable for Direct Burial", or "Direct Burial", or "Burial" as specified per ANSI/UL467
- 4.2 The smallest unit package shall contain the information listed under 4.1, and shall also include installation tooling.

5.0 Grounding Connector Installation

- 5.1 Installation of connectors shall be made in accordance with the manufacturer's recommendations. The instructions typically include conductor preparation (cleaning, pre-crimp), installation tool and die selection, and application of the proper number of crimps.
- 5.2 Connectors must be installable under all types of weather/field conditions without special safety precautions or procedures.
- 5.3 Connectors must be installable without using or producing hazardous materials or byproducts.

6.0 Ground Connector Inspection

- 6.1 Compression dies must provide embossment of the connector upon successful installation. The embossed index must match the marking on the installed connector.
- 6.2 Connector marking information specified in 4.1 must be legible after installation for inspector cross-reference.
- 6.3 Closed barrel connectors may have inspection holes at the appropriate location to verify proper cable insertion.

7.0 Performance

- 7.1 All system connectors must be Listed by Underwriters Laboratories/ Canadian Standards Association for both direct burial in earth or embedment in concrete per ANSI/UL467 Standard for Grounding and Bonding Equipment/CSA C22.2 No. 41.
- 7.2 All ground connectors must meet the requirements of IEEE Standard 837 Standard for Qualifying Permanent Connections Used in Substation Grounding.
- 7.3 Connectors must be suitable for lightning protection applications. Listing to UL96 Lightning Protection Components is preferred on applicable items.

HARDWARE DATA

Recommended Tightening Torque

The hardware used in connectors must be compatible with the connector material, have high mechanical strength and be corrosion resistant.

Copper alloy connectors have hardware made of DURIMUM™, which is the BURNDY trade name for silicon bronze alloy ASTMB99. This material was first introduced by BURNDY in 1927 for use in outdoor construction and today is the standard throughout the industry.

Aluminum connectors generally have aluminum alloy hardware. The bolts are 2024T4 and anodized to resist corrosion. The nuts are 6061T6, which is resistant to corrosion and does not require anodizing. Bolts are lubricated to eliminate galling and to provide consistent clamping forces.

The size material for clamping hardware are selected to provide the required force when tightened to the recommended torque. To reduce or greatly exceed the recommended torque can adversely affect the performance of the connector.

Steel Hardware	
Bolt Size	Recommended Torque (Inch Pounds)
1/4 - 20	80
5/16 - 18	180
3/8 - 16	240
1/2 - 13	480
5/8 - 11	660
3/4 - 10	1050

Aluminum Hardware	
Bolt Size	Recommended Torque (Inch Pounds)
1/2 - 13	300
5/8 - 11	480
3/4 - 10	650

DURIMUM™ (Silicon Bronze) Hexagonal Bolt Data

DURIMUM™ (Silicon Bronze) Hardware							
Catalog Number Series*	"A" Bolt Size	"B"	"C"	"D"	Recommended Torque (in-lb)**	Min. Breaking Force (lb)	Min. Shearing Force (lb)
25X__HEB	1/4 - 20	7/16	.50	.16	80	1,780	990

† The designation "inch" is the approximate diameter in proper fraction of an inch.

‡ The designation AWG is a combination of the number of wires each of the American Wire Gauge size indicated by "No."

* Diameter of circumscribing.

** Breaking loads of 7-wire and 19-wire conductors are taken as 90% of the sum of the breaking loads of individual wires; breaking load of 3-wire conductors is taken as 95% of the sum of the breaking loads of the individual wires.
